Life Choices Academy

- Full-stack(coding)

## SKILL

HTML 5

CSS 3

BOOOTSTRA;P

JAVASCRIPT

NODE JS

VUE JS

MYSQL

2D ANIMATION (Blender)

## PROFILE

My name is Thandolwethu Beko 19 . I am a intern full-stack web developer at Life Choices Studio

I would say i started my coding journey in high school where i took Mathematics, Physics and Information Technology as some of my subjects

For my post matric education I took a coding course at life choices academy but to really gain all the skills I have today I also took a few online courses that helped me obtain some really valuable skills like ui/ux designing, coding, and 2D animation with Blender.

I have learnt a lot from these resources and i have worked on a few projects which I showcase on my portfolio. Right now I am looking to take the next step towards growing as a developer.
